

# People Mover Frequently Asked Questions

## How do I know what bus route I need?

1. Look for the bus stops near your departure and arrival points. Each bus stop has a sign designating what routes serve it with the route number in a white circle (see photo below). If you see a route number on both signs, you know that bus route will meet your needs.

Or

2. Refer to a system map. You can find one on the back of a ride guide, posted at the bus stop, and on the web at [www.PeopleMover.org](http://www.PeopleMover.org). Routes are highlighted by different colors. Look at your origin and destination to determine what route best serves those two locations. If two buses are needed, consider transfers at the downtown or diamond transit centers, Providence hospital or Muldoon transfer center.

## How do I locate a bus stop?

1. Now that you know your bus route, go to <http://BusTracker.muni.org>. In the pink box on the left, click on your route number. The map will show that bus route and individual stops highlighted with grey circles. Consider the direction the bus will travel and zoom in enough so you can choose the stop on the correct side of the street. Click on the circle of the bus stop near your departure point and it will show the next three scheduled times.

Or

2. Go to "My Neighborhood" (See screen shot, middle right) at <http://Neighborhood.muni.org>. Under "Search for a street address," type in your address. In the drop down menu under Category, choose "local services" and click "find". You will then see a map of the area with locations of bus routes and bus stops. Scroll down on that page for links to bus stop schedules in that neighborhood. (See bottom right.)

Or

3. Look for a bus stop sign on the roads near your home (see bus stop photo at top). Each bus stop is marked with a white sign with blue and green horizontal stripes. Schedules are posted for all routes that serve each bus stop. Most stops also have a system map and many stops have amenities such as shelters, benches, and lighting.

# People Mover Frequently Asked Questions (continued)

## When will the bus come?

1. On the web, go to <http://BusTracker.muni.org>. (See screen shot of web page on back.) In the pink box on the left, click on the route you are interested in. The map will show the highlighted route and individual bus stops are depicted by grey circles. Click on a bus stop to obtain schedule information.

Or

2. Look in the Ride Guide (for a list of locations see next question). Find the schedule for your route (see sample at right). Schedules show times at major stops that are referred to as "timepoints." There are many bus stops between timepoints. Use the timepoint located before your bus stop to determine the departure time. A bus will never leave a timepoint early.
