ASSEMBLY MEMORANDUM

No. AM 492-2010

Meeting Date: September 14, 2010

1 **From: MAYOR**

2
3 **Subject: AN ORDINANCE AMENDING ANCHORAGE MUNICIPAL CODE**
4 **SECTIONS 3.20.010 AND 3.20.070 TO RESTRUCTURE**
5 **PLANNING, DEVELOPMENT SERVICES, AND COMMUNITY**
6 **PLANNING & DEVELOPMENT WITHIN THE EXECUTIVE**
7 **BRANCH.**
8

9 This ordinance is the Administration's 2010 Executive Organization for
10 Assembly approval. The amendments to chapter 3.20 establish organizational
11 responsibilities, provide the basis for identifying 2010 expenditure reductions,
12 and represents the template for preparation of the 2011 budget.
13

14 The ordinance realigns existing departments to better reflect the priorities of
15 this Administration. The restructuring of the Office of Community Planning &
16 Development:
17

- 18 • Consolidates seven existing departments (Planning, Development
19 Services, Maintenance & Operations, Project Management & Engineering,
20 Traffic, Heritage Land Bank, and Neighborhoods) into three operating
21 departments (Real Estate, Community Development, and Public Works).
22 (See **Exhibit B**.)
23
- 24 • Creates more efficient department structures that deliver better service to
25 customers.
26
- 27 • Aligns organizational structure with processes.
28
- 29 • Realizes better work efficiencies by relocating division functions under the
30 right department.
31

32 The primary organizational issues this reorganization addresses are:
33

- 34 • There is currently no Public Works Department within the MOA, even
35 though MOA codes, administrative process, and the public assume there
36 is one.
37
- 38 • Permitting functions are scattered throughout several departments.
39 Permitting processes cross multiple unrelated department organizations.
40
- 41 • Inspection functions are similarly distributed among a variety of
42 departments.
43

- Coordination between departments is cumbersome, administrative functions are inconsistent, and public interaction is frustrating.

The primary features of this reorganization are:

- **Public Works Department**

The Public Works Department is being recreated to include the Divisions of Engineering (formerly PM&E), Maintenance & Operations (M&O), and Traffic. The overriding mission of this department is to act as stewards of the public infrastructure of Anchorage, including roads and drainage facilities, watersheds, buildings, and community facilities. These divisions will design, build, and maintain public assets.

- Within Public Works, several changes are proposed. Communications is moved from Traffic to M&O. Communications installs and maintains the radio systems in most municipal vehicles and manages the municipal microwave network. This function fits well with the mission of the M&O Division.
- The Private Development section is moved from Engineering (PM&E) to Development Services. This section is an important part of the development process, and will now be located within the department managing the permitting process related to development of real estate.
- Transportation Planning moves from Traffic Engineering to Planning. This section handles the AMATS function and manages planning grants. This section clearly performs planning functions and should be part of Planning. Moving this section back into the Planning Division of the Community Development Department will provide for better interaction and coordination between municipal planners.

- **Community Development Department**

The new Community Development Department combines together three departments: Planning, Development Services, and Neighborhoods. Community Development will be charged with managing planning and permitting of the built environment, both public and private. The new department will handle real estate projects from zoning approvals and platting through subdivision development and building construction stages, and will also manage the enforcement of regulations and laws that govern these processes. Additionally, Neighborhoods will become a division of the new department, managing the Community Development Block Grant (CDBG) function as a key implementation tool for municipal planning

1 functions. Placing Neighborhoods within the new Community
2 Development Department will also aid the weatherization program, since
3 weatherization staff from Neighborhoods work in constant interaction with
4 staff from Development Services.
5

6 • **Real Estate Department**
7

8 The new Real Estate Department will manage all municipal real estate
9 assets and processes and provide staff and administrative support for the
10 Heritage Land Bank.
11

12 Both of the new larger departments, Public Works and Community
13 Development, will have consolidated administrative divisions that will be
14 responsible for managing all administrative resources and processes, including
15 budgeting, payroll, accounts payable and receivable, and all other
16 administrative activities. The administrative divisions will standardize
17 procedures, forms, and reporting for more streamlined administrative functions.
18

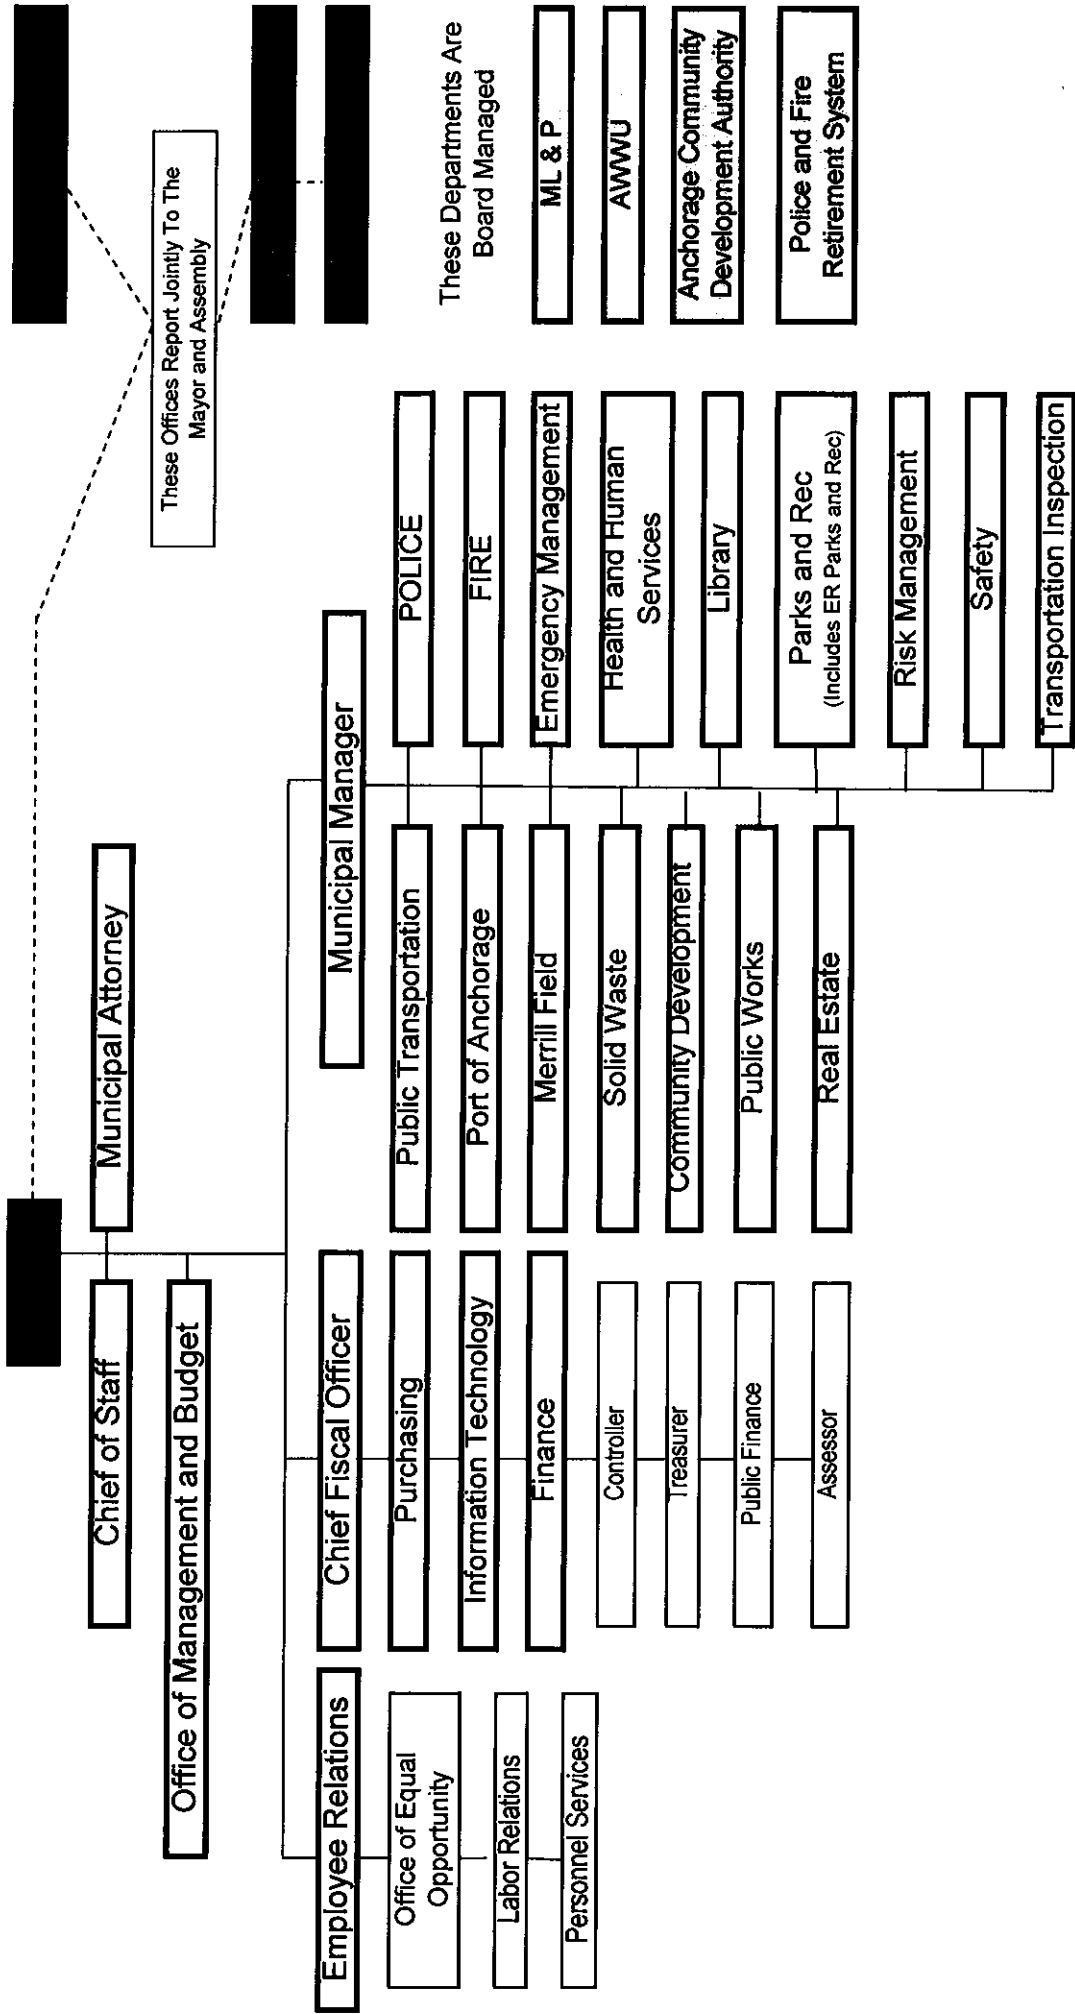

19 The goal is to complete the implementation of this reorganization this fall,
20 although there will be an ongoing effort to identify additional organizational
21 improvement opportunities. Once implemented, this structure results in three
22 departments with clear and focused missions, with strong administrative
23 support, and improved customer relationships and efficiencies. All three new
24 departments will report directly to the Municipal Manager once this re-
25 organization is approved
26

27 This ordinance is expected to reduce overhead costs by approximately
28 \$621,000.00/ year. These savings are achieved through operating efficiencies,
29 reduced vendor costs and labor reductions, primarily through attrition.
