

February 14 Coalition Meeting Recap

The Southcentral Mayors' Energy Coalition met February 14 to discuss the current list of possible Technical Committee nominees. Everyone on the standing list was approved. Additions included individuals with relationships with the state government in order to increase the Coalition's cooperation at that level. They also chose to expand the list of specialists to include geologists, various types of engineers, and a petroleum economist in order to better understand the financial impacts of Cook Inlet natural gas.
