Dan Sullivan, Mayor

ON-SITE SYSTEMS TECHNICAL REVIEW BOARD MINUTES OF MEETING

Date: July 27, 2011

Members Present: Joel Neimeyer – chairman
Scott Hattenburg
Mark Spafford
Matt Edge

Absent: Lori Davey - excused

Staff Present: Deb Wockenfuss
Ross Noffsinger
Jay Crewdson

Visitors Present: Andy McKinlay – Premier Tech
Luke Duffy – Isaac’s Pumping
Norm Tibbets – Isaac’s Pumping

The meeting was called to order at 11:40 p.m. by Joel Neimeyer.

Approval of Minutes: Minutes of the April 11, 2011 meeting were approved.

Staff Report: None

Old Business: The board discussed having the Biocycle wastewater system tested through the coldest months of the year instead of the full year. The systems to be tested are to represent typical 4 bedroom systems in the area. The department is to work with Lars Spurkland to select the systems to be tested.

The board has tentatively agreed on some possible dates to resume reviewing the proposed wastewater code. Joel will confirm.

Joel wanted to know if he should pursue working with Bill Schnabel, UAF, to develop a wastewater system testing facility. Instead of developing our own testing, we will wait to see if certification from BNQ (Bureau De Normalisation Quebec) will work for municipal approval.

New Business: Andy McKinlay with Premier Tech presented to the board the Ecoflo wastewater treatment system. Mr. McKinlay is to submit a request to the board to have the

BNQ certification accepted in place of local testing. The board requested that the department review the BNQ certification and present findings to the board.

Meeting adjourned at 1:20 p.m.
