# Independent Auditors' Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

Honorable Members of the Municipal Assembly Municipality of Anchorage, Alaska:

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the Municipality of Anchorage, Alaska as of and for the year ended December 31, 2007, which collectively comprise the Municipality of Anchorage's basic financial statements, and have issued our report thereon dated July 28, 2008. Our report was modified to include a reference to other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Other auditors audited the financial statements of the Anchorage School District, a component unit. This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors.

# Internal Control over Financial Reporting

In planning and performing our audit, we considered the Municipality of Anchorage, Alaska's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing an opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Municipality of Anchorage's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Municipality of Anchorage's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed below, we identified a certain deficiencies in internal control over financial reporting that we consider to be significant deficiencies.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Municipality of Anchorage, Alaska's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the Municipality of Anchorage's internal control over financial reporting. We consider the deficiencies described in the accompanying schedule of findings and questioned costs to be significant deficiencies in internal control over financial reporting (2007-1, 2007-2 and 2007-3).

Honorable Members of the Municipal Assembly Municipality of Anchorage, Alaska September 29, 2008 Page 2

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Municipality of Anchorage's internal control.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are also considered to be material weaknesses. However, of the significant deficiencies described above, we consider items 2007-2 and 2007-3 to be material weaknesses.

# Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Municipality of Anchorage, Alaska's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the Municipality of Anchorage, Alaska in a separate letter dated July 28, 2008.

This report is intended solely for the information and use of management, Municipal Assembly, and the federal and state awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

# Independent Auditors' Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance with OMB Circular A-133

Honorable Members of the Municipal Assembly Municipality of Anchorage, Alaska:

#### Compliance

We have audited the compliance of the Municipality of Anchorage, Alaska with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement that are applicable to each of its major federal programs for the year ended December 31, 2007. The Municipality of Anchorage, Alaska's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the Municipality of Anchorage, Alaska's management. Our responsibility is to express an opinion on the Municipality of Anchorage, Alaska's compliance based on our audit.

The Municipality of Anchorage, Alaska's basic financial statements include operations of its component unit, the Anchorage School District, which received \$58,557,125 in federal awards during their fiscal year ended June 30, 2007, which are not included in the schedule of federal expenditures of federal awards for the year ended December 31, 2007. Our audit, described below, did not include the operations of the Anchorage School District, because it was subjected to a separate audit in accordance with OMB Circular A-133.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Municipality of Anchorage, Alaska's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the Municipality of Anchorage, Alaska's compliance with those requirements.

In our opinion, the Municipality of Anchorage, Alaska complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended December 31, 2007. However, the results of our auditing procedures disclosed an instance of noncompliance with those requirements, which is required to be reported in accordance with OMB Circular A-133 and which is described in the accompanying schedule of findings and questioned costs as item 2007-4.

Honorable Members of the Municipal Assembly Municipality of Anchorage, Alaska September 29, 2008 Page 2

#### **Internal Control Over Compliance**

The management of the Municipality of Anchorage, Alaska is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the Municipality of Anchorage, Alaska's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Municipality of Anchorage, Alaska's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the Municipality's internal control that might be significant deficiencies or material weaknesses as defined below. However, as discussed below, we identified a certain deficiency in internal control over compliance that we consider to be a significant deficiency.

A control deficiency in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider the deficiency in internal control over compliance described in the accompanying schedule of findings and questioned costs as items 2007-4 to be a significant deficiency.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the entity's internal control. We did not consider the deficiency described in the accompanying schedule of findings and questioned costs to be a material weakness.

# Schedule of Expenditures of Federal Awards

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund and the aggregate remaining fund information of the Municipality of Anchorage as of and for the year ended December 31, 2007 and have issued our report dated July 28, 2008. We did not audit the financial statements of the Anchorage School District, which is a discretely presented component unit. We also did not audit the financial statements of the Anchorage Community Development Authority, which is a discretely presented component unit. Our audit was performed for the purpose of forming opinions on the financial statements that collectively comprise the Municipality of Anchorage, Alaska's basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Honorable Members of the Municipal Assembly Municipality of Anchorage, Alaska September 29, 2008 Page 3

This report is intended solely for the information and use of the audit committee, management, Municipal Assembly, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Notes to Schedule of Expenditures of Federal Awards

Year Ended December 31, 2007

#### General

The accompanying schedule of Expenditures of Federal Awards presents the activity of all federal financial assistance programs of the Municipality of Anchorage, Alaska (Municipality) excluding its component unit, the Anchorage School District. The Municipality's reporting entity is defined in Note 1 to the Municipality's financial statements. Federal financial assistance received directly from federal agencies as well as federal financial assistance passed through other government agencies is included on the schedule.

# **Basis of Accounting**

The accompanying schedule of expenditures of federal awards is presented using the accrual basis of accounting, which is described in Note 1 to the Municipality's financial statements.

# Programs with Outstanding Loans Receivable

The following U.S. Department of Housing and Urban Development (HUD) programs have outstanding loans receivable at December 31, 2007:

<u>Program</u>	<u>CFDA</u>	Balance
Anchor/Home/Disabled Access Program	14.239	\$ 3,160,610
Rental Rehabilitation	14.218	11,317
CDBG Rehabilitation	14.218	1,348,068
Mutual Rent	14.218	433,918
HUD Section 108 Loans	14.248	1,925,393
momer		
TOTAL		\$ <u>6,879,306</u>

Schedule of Findings and Questioned Costs

# (2) Findings Relating to Basic Financial Statements Reported in Accordance with Government Auditing Standards

# 2007-1 PeopleSoft System, CAMA and Taxes software applications

# Criteria

Policies and procedures should be in place to ensure that user access reviews are conducted regularly. Changes to in-scope applications should be tested, validated and approved prior to implementation. Developers should be restricted from implementing code in the production computer information system environment.

#### Condition

System access – There are no formal procedures to periodically review user access. The review of user access is significant as it can detect unauthorized or terminated users as well as provide a review of segregation of duties.

Program changes – We noted that program changes and the testing of changes are not consistently documented. We also noted that developers have access to promote changes to production.

#### Context

PeopleSoft human resources -5 of 8 selections did not have sufficient documentation for the change. 2 of the 5 did not have evidence of testing and 3 of 5 didn't have any documentation.

PeopleSoft financial - 18 of 25 selections did not have evidence of testing.

CAMA and taxes - No documentation of testing or results is retained.

#### **Effect**

Unauthorized or terminated users may continue to have inappropriate access. Program changes may have undesired consequences and unauthorized releases of program changes may be released to the production environment.

#### Cause

Unknown

#### Recommendation

System access – We recommend that user access reviews be conducted and documented regularly and that exceptions are researched and resolved timely.

Program changes – We recommend that changes to in-scope applications are tested, validated and approved prior to implementation and that documentation of these procedures is retained. We recommend that developers be restricted from implementing code in the production environment.

# 2007-2 - High Turnover in Key Accounting Positions

#### Criteria

The Municipality's policies require that all employees have knowledge of their positions and what is required of them to perform their daily duties.

#### Condition

The Municipality had significant turnover in key accounting positions in 2007 including the Chief Fiscal Officer, Controller, Assistant Controller and Grants Supervisor.

#### Context

Not applicable

#### Effect

With turnover there was a significant loss of institutional knowledge and governmental accounting experience. Significant turnover presents a greater risk of material misstatements remaining undetected as staff are less likely to be familiar with the operations of the Municipality and may not be able to determine if all activity is being recorded. Additionally, the less experienced staff are less likely to recognize if transactions are not being accounted for in accordance with governmental accounting guidance. As a result, the extent of audit procedures was expanded and KPMG provided significant assistance to the Municipality during the financial reporting process.

#### Cause

Not applicable

#### Recommendation

We recommend that the Municipality analyze the reasons for turnover and implement appropriate solutions, such as training, additional contractors, or additional staffing.

# 2007-3 Capital Assets

#### Criteria

Capital assets acquired with federal and state funds should be capitalized when purchased or in the case of the Port, when MARAD transfers the assets to the Port.

# Condition

There has been significant activity at the Port of Anchorage and much of the funding for the expenditures comes from the Federal and State of Alaska governments. Certain assets transferred to the Port prior to 2007 and were not reported in the Municipality financial statements for 2006. The error was not discovered by management until 2007.

# Context

Not applicable

#### Effect

Prior to 2007, \$12,356,980 was transferred to the Port and was not reported in the Municipality financial statements for 2006.

#### Cause

Unknown

# Recommendation

We recommend that the Municipality design and implement internal control procedures that provide for timely reporting of assets contributed to the Municipality.

# (3) Findings and Questioned Costs Related to Federal Awards

2007-4-US Department of Health and Human Services, Child Care Assistance Program Grant, CFDA 93.575; US Department of Health and Human Services, Child Care Eligibility Program Grant, CFDA 93.575, passed through Alaska Department of Health and Social Services

#### Criteria

OMB Circular A-133 requires that grantees have policies and procedures in place to ensure that participant eligibility is properly determined in a manner stipulated by the grantor.

#### Condition

During the year, the Municipality of Anchorage did not have an effective review process in place to ensure participant income was properly calculated.

#### Context

30 files were selected for review and 3 participants' were determined to be eligible based upon incorrect projected income calculations.

#### Effect

This control deficiency adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control. The overpayment of child care assistance calculated as a result of the control deficiency was determined to be \$2,315.

# **Questioned Costs-None**

#### Cause

In one instance, the calculation was made incorrectly using the information from a paycheck. For the other two instances, the incorrect paycheck was used.

# Recommendation

We recommend that the Municipality of Anchorage ensure that tables utilized contain correct formulas and emphasize the importance of correctly calculating and reviewing eligibility requirements to ensure participant income is properly calculated.

# Summary Schedule of Prior Audit Findings

Year Ended December 31, 2007

# Findings Related to Basic Financial Statements

# 2006 Approval of Timesheets

#### **Condition Noted**

Approval of timesheets was not consistently documented in certain departments, with the exception of Police and Fire departments

#### Status

Corrective action was taken, there is no subsequent finding.

# Findings Related to Federal Award

# 2006-1

US Department of Health and Human Services, Child Care Assistance Program Grant, CFDA 93.575; US Department of Health and Human Services, Child Care Eligibility Program Grant, CFDA 93.575, passed through Alaska Department of Health and Social Services

# **Condition Noted**

During the year, the Municipality of Anchorage did not have an effective review process in place to ensure participant income was properly calculated.

# Status

The formula error that was in the tables was corrected.

Corrective Action Plan

Year Ended December 31, 2007

#### **Findings Related to Basic Financial Statements**

#### 2007-1

# PeopleSoft System, CAMA and Taxes software applications

# Response

The Municipality has implemented a review process on a quarterly basis to monitor system access.

Program changes, while tested in the past, will now have proper and thorough documentation supporting that the changes have been checked, tested and approved prior to releasing the changes to the production environment. A quarterly report will be produced of staff promotions of programs/processes to production and reviewed by a supervisor.

Two of the five technical analysts within the PeopleSoft group will retain rights to promote HR-Payroll programs to production in case of the need for an emergency fix. The reason for the emergency classification will be documented, and in a timely manner, management will review and approve or authorize further modifications after it has been implemented.

# 2007-2

# **High Turnover in Key Accounting Positions**

#### Response

The Municipality acknowledges that there was significant turnover during 2007. This turnover, as well as the turnover in KPMG audit staff, contributed to the length and difficulty of the audit. Unfortunately, the Municipality has limited control over its ability to retain employees, especially in today's highly mobile workforce. Our employees leave for reasons that are common to every employer: higher pay, career advancement, relocation, and lower stress and improvement in quality of life. As much as possible, we are dedicated to retaining our employees, as well as promoting within the Municipality for the benefit of both employee and employer. We have taken steps to make provisions in the Controller Division budget to provide better training to our staff.

It is difficult to find local consultants who are experienced in governmental accounting, PeopleSoft, and the comprehensive and complex accounting scenarios specific to the Municipality of Anchorage. Even so, for the first time in many years, the Municipality recognized the impact of its unusually high turnover and engaged a consultant who had previous Municipal experience to assist in facilitating the 2007 audit process.

We are encouraged that the turnover appears to have substantially decreased. For the first time in years, the Controller Division is fully staffed and the level of knowledge and experience is deeper than it was even six months ago. Additionally, two recent vacancies were filled by employees who had either

passed the CPA exam or who are CPA candidates; therefore, the caliber of the new employees joining the Controller Division is higher than we have been able to attract in other years.

#### 2007-3

# **Capital Assets**

# Response

Traditionally, the Municipality constructs its assets using internal financial resources as well as any grant contributions received. In an unprecedented agreement, the Federal Maritime Administration (MARAD) is over-seeing the construction of the Port expansion project, using Federal, State, and Port dollars. Once constructed, those assets are turned over to the Municipality and recorded on the books.

One of the challenges with the MARAD administration of the Port expansion is that most of the construction activity is not accounted for at the municipal level. As a result of this, 2006 Port asset transfers were overlooked and not entered on the Port's financial records. The 2006 omission was not discovered until 2007. These assets will ultimately be recorded as part of the major expansion asset transfer.

Although the Municipality's capital assets exceed three billion dollars, management strives to properly record all assets qualifying for capitalization, irrespective of size. Biennial inventories are required for all Municipal departments. Beginning in 2008 this requirement will be increased for the Port - rather than biennial inventories, annual Port inventories will be conducted to ensure all capital assets are being properly accounted for.

Management is currently developing further processes to identify these assets, as well as obtain necessary financial records that document asset cost and the official transfer of the assets. As the status of individual projects near completion, Port staff will confirm project completion with MARAD, and ensure the assets are recorded on the books. The Municipality is also attempting to hire an experienced consultant who will oversee these internal control enhancements and who will report directly to the Controller and CFO.

Finally, beginning in the year ending December 31, 2008, the Port will also undergo its first standalone audit during the expansion project, in addition to the Municipality's annual audit.

# Findings Related to Federal Awards

# 2007-4

US Department of Health and Human Services, Child Care Assistance Program Grant, CFDA 93.575

# Response

The Municipality is working with the grantor to ensure full program compliance, and the grantor intends to conduct a site visit by December 31, 2008. In accordance with the new grant agreement, the Municipality will complete 18 quality assurance case file reviews each month and will report quarterly to the grantor on the number of files reviewed and the results. Individual employee performance plans will be implemented as needed based on the issues found in the file reviews. Also, additional evaluation and training is being completed to improve the quality of work.

# State of Alaska Single Audit

KPMG LLP Suite 600 701 West Eighth Avenue Anchorage, AK 99501

Independent Auditor's Report on Compliance With Requirements Applicable to

Each Major Program and on Internal Control Over Compliance in Accordance with the State of

Alaska Audit Guide and Compliance Supplement for the State Single Audit

Honorable Members of the Municipal Assembly Municipality of Anchorage, Alaska:

#### Compliance

We have audited the compliance of the Municipality of Anchorage, Alaska with the types of compliance requirements described in the State of Alaska Audit Guide and Compliance Supplement for the State Single Audits that are applicable to each of its major state programs for the year ended December 31, 2007. The Municipality of Anchorage's state major programs are identified in the accompanying schedule of state financial assistance. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its state major programs is the responsibility of the Municipality of Anchorage, Alaska's management. Our responsibility is to express an opinion on the Municipality of Anchorage, Alaska's compliance based on our audit.

The Municipality of Anchorage, Alaska's basic financial statements include operations of its component unit, the Anchorage School District, which received \$334,427,154 in state awards during their fiscal year ended June 30, 2007, which are not included in the schedule of state financial assistance for the year ended December 31, 2007. Our audit, described below, did not include the operations of the Anchorage School District, because it was subjected to a separate audit in accordance with the State of Alaska Audit Guide and Compliance Supplement for the State Single Audits.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the *State of Alaska Audit Guide and Compliance Supplement for the State Single Audits*. Those standards and the *State of Alaska Audit Guide and Compliance Supplement for the State Single Audits* require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a state major program occurred. An audit includes examining, on a test basis, evidence about the Municipality of Anchorage's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the Municipality of Anchorage, Alaska's compliance with those requirements.

In our opinion, the Municipality of Anchorage, Alaska complied, in all material respects, with the requirements referred to above that are applicable to each of its major state programs for the year ended December 31, 2007.

# **Internal Control Over Compliance**

The management of the Municipality of Anchorage, Alaska is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to state programs. In planning and performing our audit, we considered the Municipality of Anchorage's internal control over compliance with requirements that could have a

Honorable Members of the Municipal Assembly Municipality of Anchorage, Alaska September 29, 2008 Page 2

direct and material effect on a state major program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance. Accordingly, we do not express an opinion on the effectiveness of the Municipality of Anchorage internal control over compliance.

A control deficiency in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a state program on a timely basis. A significant deficiency is a control deficiency, or a combination of control deficiencies, that adversely affects the entity's ability to administer a state program such that there is more than a remote likelihood that noncompliance with a type of compliance with a state program that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a state program will not be prevented or detected by the entity's internal control.

Our consideration of the internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the Municipality's internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that would be material weaknesses, as defined above.

# Schedule of State Financial Assistance

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund and the aggregate remaining fund information of the Municipality of Anchorage, Alaska as of and for the year ended December 31, 2007 and have issued our report dated July 28, 2008. We did not audit the financial statements of the Anchorage School District, which is a discretely presented component unit. We also did not audit the financial statements of the Anchorage Community Development Authority, which is a discretely presented component unit. Our audit was performed for the purpose of forming opinions on the financial statements that collectively comprise the Municipality of Anchorage, Alaska's basic financial statements. The accompanying schedule of state financial assistance is presented purposes of additional analysis as required by the State of Alaska Audit Guide and Compliance Supplement for State Single Audits and Schedules 1 through 6 are presented for additional analysis as required by the State of Alaska Department of Health and Social Services. These schedules are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of the audit committee, management, Municipal Assembly, and the State of Alaska and is not intended to be and should not be used by anyone other than these specified parties.

Notes to Schedule of State Financial Assistance

Year Ended December 31, 2007

#### General

The accompanying Schedule of State Financial Assistance presents the activity of all state financial assistance programs of the Municipality of Anchorage, Alaska (Municipality) excluding its component unit, the Anchorage School District. The Municipality's reporting entity is defined in Note 1 to the Municipality's financial statements. State financial assistance received directly from state agencies as well as state financial assistance passed through from federal government agencies is included on the schedule.

# **Basis of Accounting**

The accompanying Schedule of State Financial Assistance is presented using the accrual basis of accounting, which is described in Note 1 to the Municipality's financial statements.

Schedule of Findings and Questioned Costs

Year Ended December 31, 2007

There are no State of Alaska findings reported in 2007.

Summary Schedule of Prior Audit Findings

Year Ended December 31, 2007

There were no State of Alaska findings reported in 2006.

Corrective Action Plan

Year Ended December 31, 2007

There are no State of Alaska compliance findings for 2007. No corrective action is required.
